

The characteristics of state-operated or supported psychiatric hospital inpatient care included in the report are:

- *Hospital Demographics*
- *Hospital Revenues, Expenditures, and Staffing*
- *Patient Demographics*
- *Diagnosis Profile*
- *Length of Stay*

CHARACTERISTICS OF STATE-OPERATED OR SUPPORTED PSYCHIATRIC HOSPITAL INPATIENT CARE

NRI is pleased to provide this resource on the utilization of state-operated and supported psychiatric hospitals. The report provides a consolidated overview of state psychiatric hospitals for one year including staffing, revenue, expenditure, hospital characteristics, and characterizes of individuals served. Public mental health systems have strived to exhibit accountability and transparency. These systems tend to serve individuals with serious mental disorders who cannot afford treatment in private psychiatric hospitals or who present a danger to themselves or others; thus utilizing a significant level of public dollars. This report is a demonstration of States' commitment to provide the public with information on the systems of care for individuals with severe mental disorders.

Electronic copies are currently available to hospitals participating in NRI's Behavioral Healthcare Performance Measurement System!

Non-participants may purchase softbound and electronic copies at \$225.00 each. Please submit payment with order to NRI. Order form attached.
